

This dashboard integrates real-time bio-electrical data with automated blockchain minting to visualize your journey toward electrical equilibrium. The design prioritizes **minimalism and clarity** to ensure that high-stakes information is digestible at a glance.

UI Dashboard Structure

- **Live Fractal Waveform View:**
 - Occupies the top 40% of the screen as the primary focal point.
 - Displays the sinusoidal α sweep as a dynamic, shifting wave.
 - **Red "Active Sink" Overlay:** Highlighting specific (x, y) coordinates on the grid where **FNDR drainage** is currently occurring.
-
- **Homeostasis Metrics Panel:**
 - **Current α Factor:** Real-time numerical display of the fractional order.
 - **Extraction Rate (I/V^α):** A sliding scale showing the intensity of the current flow.
 - **Total Drained (Q):** A running counter of millicoulombs (mC) extracted during the current cycle.
-
- **BNDR Minting Status Bar:**
 - Located at the bottom of the screen to minimize visual clutter.
 - **Scanning State:** Pulsing green text indicating the fPLL is locked on the cardiac rhythm.
 - **Minting Animation:** A high-fidelity card pops up upon cycle completion: "**BNDR #ID Minted**", displaying the α factor and total charge signature.
-
- **Safety Status Indicator:**
 - A small, persistent icon (e.g., a shield) confirming the **0.5V Electrochemical Clamp** is active. [1, 2]
-

Interaction Design

- **Tactile Feedback:** The app uses **Haptic Touch** to provide a distinct vibration pattern when an FNDR event is detected and successfully drained.
- **Customization:** Users can toggle between "**Minimalist View**" (focusing on the graph) and "**Audit View**" (displaying raw data tuples for verification).

Visual Consistency

- **Color Palette:** Deep black backgrounds provide high contrast for vibrant neon gradients.
- **Typography:** Large, readable fonts (SP units) for critical metrics to prevent finger fatigue during long sessions. [3, 4]

Would you like to refine the **BNDR Token Gallery** view where you can inspect the specific fractal history of each minted session?
